

¿ Until 19 July 2008

Beetle with a fungus growing out of it.

Saki (don't know which one)

Amazon "Mud Fish"

Pleasing fungus beetle

I took 50 pictures of this thing, and apparently this is the out of focus one. Sorry.

Puss Moth Catapiler

Tapír!! Her name is Watusa.

A fantastic flat bug (Aradidae).

BIG leaning tree.

A very rare short-eared dog.

Pretty Butterfly
